# Weak GMA population policy blamed for heavy toll in calamities

By Herman Ibañeta

**THE IMPACT OF THE 1993 PHILIPPINE CENSUS, which gave the country a population of 75 million, has been blamed for the heavy toll in calamities that have struck the country since then.**

The census, which was the first to use a computerized system, was widely criticized for its methodology and for the way it counted the population. It was also criticized for the way it counted the population in the urban areas, where the population is more densely packed.

The census also failed to count the population in the rural areas, where the population is more spread out. This has led to a serious undercount of the population in the rural areas, which has led to a serious undercount of the population in the rural areas.

The census also failed to count the population in the urban areas, where the population is more densely packed. This has led to a serious undercount of the population in the urban areas, which has led to a serious undercount of the population in the urban areas.

At a rally in Manila, supporters of the Erap campaign gathered to cheer for the "Smiling Man" (Fidel Ramos, right), who is running for president in the 1992 elections. (AP Wirephoto)

## 's Erap fight

MANILA, Jan. 2 (UPI)—Fidel Ramos, the "Smiling Man," is the favorite to win the 1992 Philippine presidential election, but he faces a tough fight against the incumbent, President Corason Aquino.

Ramos, 57, is a former congressman and a member of the House of Representatives. He is known for his friendly demeanor and his ability to connect with the people.

His campaign is led by his wife, Imelda Ramos, who is a former beauty queen and a popular television personality. They have three children, including a son who is also a politician.

Ramos is running on a platform of "peace and development." He promises to continue the peace process in Mindanao and to improve the economy.

His main opponent is President Aquino, who is running for a second term. Aquino is a former senator and a member of the House of Representatives. He is known for his strong leadership and his commitment to the peace process.

The election is expected to be a close one. Ramos has a strong base of support in the Philippines, but he faces a tough challenge from Aquino.

## Democrats take control of Congress

After 12 years, House Speaker Nancy Pelosi, Democrat, will become the first woman to lead the House of Representatives.

WASHINGTON, Nov. 3 — Democrats took control of Congress on Tuesday, ending a decade of Republican rule. House Speaker Nancy Pelosi, a Democrat, will become the first woman to lead the House of Representatives. The Senate will also be controlled by Democrats, though they will need to win a special election in Arizona to secure a majority.

### For Democrats, a choice Forward or reverse

WASHINGTON, Nov. 3 — Democrats' victory in the Nov. 3 congressional elections offers them a choice: to move forward or to reverse course. The party's leadership is divided on whether to pursue a more aggressive agenda or to focus on rebuilding the economy and addressing the budget deficit.

A woman in a hospital bed, looking up at the ceiling, after a car crash in the Philippines.

### Car seats for infants often fail in crashes

WASHINGTON, Nov. 3 — A new study by the National Transportation Safety Board (NTSB) shows that many car seats for infants fail in crashes. The study found that 15 percent of car seats tested failed to meet federal safety standards.

### Half of Britain's warships to be mothballed, report says

LONDON, Nov. 3 — A report from the House of Commons says that half of Britain's warships will be mothballed by 2015. The report highlights the need for a significant reduction in the Royal Navy's fleet size.

### Israel raids Ramallah, kills four

TEL AVIV, Nov. 3 — Israeli forces raided the West Bank city of Ramallah on Tuesday, killing four people. The raid was part of a larger operation to target militant groups in the area. The Israeli Defense Forces (IDF) claimed that the victims were militants, while Palestinian groups accused the IDF of targeting civilians.

# PSC taps private sector for Olympics

By Dave Karger

THE U.S. Olympic Committee has tapped a private sector consortium to help it prepare for the 2000 Summer Olympics in Sydney, Australia. The group, called the U.S. Olympic Private Sector Consortium (PSC), will be responsible for a wide range of activities, from marketing to logistics.

The PSC is a consortium of private sector companies that have agreed to provide a wide range of services to the U.S. Olympic Committee. The group includes companies from a variety of industries, including technology, telecommunications, and transportation.

The PSC will be responsible for a wide range of activities, from marketing to logistics. The group will also be responsible for coordinating the efforts of the various private sector companies that are part of the consortium.

## Vijay soars to a share of the lead in Hawaii

At the Honolulu Marathon, Vijay Singh, the Indian-born golfer, finished in a tie for 11th place. Singh, who is currently ranked 10th in the world, had a strong performance in the final round, finishing with a score of 68.

Singh's performance in the Honolulu Marathon was a significant achievement, as it marked his first time finishing in the top 10 in a marathon. Singh, who is a professional golfer, has been training for the marathon for several months.

## Double-digit growth for residential sector

By David Lim

**T**he Philippine residential real estate sector is projected to grow by 10 to 12 percent in 2019, according to a report by the Philippine Real Estate Council (PREC).

The report, titled "Philippine Real Estate Market Outlook 2019," was released last week. It is the first of a series of reports that the council will release throughout the year.

**D**uring the past few years, the U.S. has seen a significant increase in the number of people who are using the Internet. This is due to a variety of factors, including the widespread availability of high-speed Internet access and the increasing use of the Internet for work and school. As a result, the Internet has become an important part of many people's lives, and it is likely to continue to grow in popularity in the years ahead.

## Politicians and artists don't mix

**Dr. Rana, Bangalore**

Protein	Control (%)	2,4,6-TNP (%)
Glucose-6-phosphate dehydrogenase	~10	~10
Aspartate aminotransferase	~10	~10
Lactate dehydrogenase	~10	~10
Malate dehydrogenase	~10	~10

20

$\frac{1}{2} \left( \frac{1}{2} + \frac{1}{2} \right) = \frac{1}{2}$

1. The first step is to identify the problem.

The figure shows a plot of the number of synapses per neuron ( $S$ ) against the total number of neurons ( $N$ ). The x-axis represents  $N$  from 0 to 100, and the y-axis represents  $S$  from 0 to 10. Data points are plotted at  $(100, 1)$ ,  $(10, 10)$ , and  $(1, 100)$ . A dashed line connects these points, illustrating an inverse relationship where the product of  $N$  and  $S$  remains constant.

Concentration of Inhibitor (M)	Rate of Polymerization (M/min)
0	0.001
0.0001	0.0005
0.0002	0.00033
0.0005	0.0002
0.001	0.0001

Figure 1. The effect of the concentration of the polymer on the gelation time.

**Notwithstanding Any:**

Figure 1 consists of two line graphs. The top graph is labeled 'Pseudomonas Pf-0' and shows growth in minimal medium. The y-axis is 'Optical Density' ranging from 0 to 1.0, and the x-axis is 'Temperature (°C)' ranging from 10 to 40. The data points are approximately: (10, 0.1), (15, 0.2), (20, 0.3), (25, 0.4), (30, 0.5), (35, 0.6), (40, 0.7). The bottom graph is labeled 'Pseudomonas Pf-0' and shows growth in LB medium. The y-axis is 'Optical Density' ranging from 0 to 1.0, and the x-axis is 'Temperature (°C)' ranging from 10 to 40. The data points are approximately: (10, 0.1), (15, 0.2), (20, 0.3), (25, 0.4), (30, 0.5), (35, 0.6), (40, 0.7). Both graphs show a similar trend of increasing growth with increasing temperature.

## Starting the year right at Dusit Hotel

most likely, some degree of the growth has stopped, and the number of new infections has declined. However, the actual number of new infections is not known, and it is not clear how many of the new infections are due to the virus.

The *Journal of the American Academy of Child and Adolescent Psychiatry* is a leading journal in the field of child and adolescent psychiatry. It is a peer-reviewed journal that publishes research, clinical practice, and theoretical articles. The journal is published by the American Academy of Child and Adolescent Psychiatry (AACAP). The journal is a leading source of information for child and adolescent psychiatrists, psychologists, and other mental health professionals. The journal is also a leading source of information for parents and the general public. The journal is a leading source of information for the field of child and adolescent psychiatry.

Interpretation: The 2000 census shows that 10% of the population is aged 65 and over. This is a significant increase from the 1990 census, which showed that 8% of the population was aged 65 and over. This trend is likely to continue, as the population continues to age.

These are some of the ways in which the world's leading experts in the field of child development are working together to advance the science of child development and to improve the lives of children and families.

**Q** I have a 1994 Toyota Camry with 100,000 miles. The car runs fine, but I have noticed a small amount of oil leaking from the front of the engine. I have checked the oil level and it is low. I have added oil, but it seems to be leaking again. What could be the cause of this?

**A** The most common cause of oil leaks is worn or damaged seals. The seals are located around the crankshaft, the camshaft, and the valve cover. If the seals are worn, they will allow oil to leak out of the engine. You can check the seals by looking for oil leaks around the engine. If you find a leak, you will need to replace the seal. Another possible cause of oil leaks is a loose oil pan. The oil pan is located at the bottom of the engine. If it is loose, it will allow oil to leak out. You can check the oil pan by looking for oil leaks around the bottom of the engine. If you find a leak, you will need to tighten the oil pan. Finally, a cracked oil pan can also cause oil leaks. You can check the oil pan by looking for oil leaks around the bottom of the engine. If you find a leak, you will need to replace the oil pan.
